

Requirements specifications

User requirements:

- 1) Businesses must be able to identify themselves during the sign-up process using their business number. -> REMOVED
- 2) Users must be able to enter the event's group chat -> ADDED
- 3) Users must be able to delete notifications by swiping them to the right. -> ADDED
- 4) The user must be able to call or text other users who are going to attend his/her same events. -> CHANGED TO
 - a. The user must be able to text other users who are going to attend his/her same event using the event's group chat.

Functional requirements:

- 1) If a user presses the "Call me" or "Text me" button (the one next to each user who is going to attend the user's same event), the system must call the selected user or open the messages application in order for the user to send him/her a message. -> REMOVED
- 2) Whenever a user accesses the "Events" section for the first time, the system must prompt him/her to enter at least two trusted members. Entering the details of two trusted members is mandatory for the user. -> ADDED
- 3) The system must provide users with group chats for each single event where they can discuss about different topics. -> ADDED
- 4) The system must verify that a business entered a valid business number and has supplied at least 10 discount codes (which will later be available to users who go to their events through our application) before letting it promote its events on the application. [ref 9] -> REMOVED
- 5) The system must never store or share a user's live location unless the "Emergency!" button is voluntarily pressed by the user. -> REMOVED
- 6) After the user has signed up, the system must ask him/her to select his/her hobbies from a drop-down list. -> CHANGED TO
 - a. After the user has signed up, the system must ask him/her to select a maximum of 7 hobbies from a drop-down list.

Usability requirements:

- 7) Each main page within the application must be accessible through a tab navigation. -> CHANGED TO
 - a. Each main page within the application must be accessible through a tab navigation aside from the "My points" section. The latter must be accessible through a top-down gesture on every page of the application.
- 8) The calendar must be scrollable. -> ADDED
- 9) Calendar days that include a task or class added by the user should display a circle or symbol representing the presence of a task. -> ADDED
- 10) The calendar must represent the current day in a different way (e.g. different background colour). -> ADDED
- 11) New notifications and old notifications must be differentiated (e.g. different text or background colour). -> ADDED

- 12) The “Help Me!” button within the “My Map” section (the one where all the details regarding the event a user is going to attend are displayed) must be apparent and easily noticeable. ->
CHANGED TO
- a. The “Emergency” button within the “Schedule” section must be apparent and easily noticeable.
